

Net Neutrality is an essential part of the job-producing, commerce-fueling, open marketplace that is the World Wide Web. By removing this essential piece of legal protection, the FCC would severely damage the impartial nature of American connections to the Internet. Please, don't remove the barrier preventing ISPs from dictating what websites consumers will favor. Without Net Neutrality, these companies will be allowed to throttle broadband speeds and demand more money for different aspects of what ought to be a free and open playing field of commerce. **Please keep the Net Neutral.**

Sincerely,
Griffen Price
